Phipps NBC	Gold Star	5.2%	Following the merger of Phipps and NBC in 1957, all dark beer production moved up to NBC's North brewery and all pale beers went to Phipps' South Brewery. That was never going to go down well with proud and loyal men so without informing the management, they dusted off the old pre WW1 Phipps IPA recipe and strength and brewed it in place of NBC's ale. When Watneys took over a few years later this was the first casualty of their rationalisation of the brewing range, Gold Star was too strong, too expensive and too good to survive. This titan of a beer has the colour and drinking quality of the IPA but with a subtle punch of export strength ale.
